PROJECTS

Captain's Log

Voice-powered Progressive Web App

A voice-powered Progressive Web App inspired by One Piece and Star Trek that uses OpenAI's Whisper technology to transcribe speech into text, creating a personal digital logbook with AI-powered summarization. Built with Next.js 14, React 18, shadcn/ui, OpenAI Whisper API, MongoDB, NextAuth.js, Tailwind CSS, react-hook-form, and Zod.

VoteWise

Political Web Application

A political web application that allows users to track their local representatives' voting records and legislation using the Congress.gov API for increased civic engagement. Built with Next.js 15, React 19, TypeScript, and Congress.gov API.

Break the Wall

Transparency Tool for SEC Filings

A transparency tool that analyzes SEC filings and corporate data to expose corporate hierarchies and executive compensation, revealing the "wall" of positions designed to protect wealth rather than create value. Built with Next.js, TypeScript, SEC EDGAR API, d3.js, and Recharts.

Steam Insight

Steam Game Discovery Platform

A modern Steam game discovery platform built with Next.js and TypeScript. Explore thousands of games with intelligent search, detailed reviews, rich media, and advanced analytics. Technologies: Next.js, TypeScript, React, Steam API.
